PAT margin	60.1%	43.9%	+16.2	+36.9	

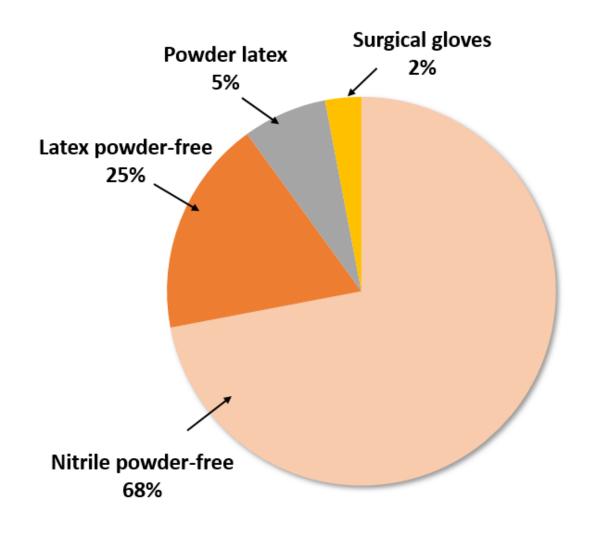

- The demand for medical gloves and other medical PPEs continue to remain robust and will continue for the next 1.5 to 2 years
- Supermax's production capacity remain in oversold position
- We have seen the emergence of new consumer markets and new consumption that we have not seen before prior to Covid-19
- 3<sup>rd</sup> consecutive quarters where we see Supermax's business model yields the highest returns than the traditional OEM model
- Supermax's Own Brand Manufacturing ("OBM") cum distribution model allows the Company to have 2 streams of income in the entire supply chain and distribution channel
- Increase in demand in Manufacturing and the exponential growth in demand in Distribution from end users have resulted in Supermax Group capturing the highest returns in terms of topline and bottomline

- Higher manufacturing profits for Supermax mainly contributed from:
  - a) Supermax's Glove Manufacturing Division chose not to lock-in capacity in March 2020 for shipments until 12/2020 and chose not to lock in the glove prices with the Big 5 giant distributors from the USA supplying to the US government agencies after the US Administration invoked the Defence Production Act
  - b) Supermax opted not to participate in long term contracts with pricing mechanism with the big 5 distributors from USA and Germany
- Higher profits of Supermax Group mainly due to the following reasons:
  - a) Block A lines at Plant #12 are fully commissioned and contributed in 4Q 2020
  - b) Large % of capacity are being sold to end users via own distribution centres and via independent distributors in over 165 countries
  - c) Increase in sales in other PPEs
  - d) Increase in sales from Supermax's own distribution centres in 7 countries

## **HIGHLIGHTS**

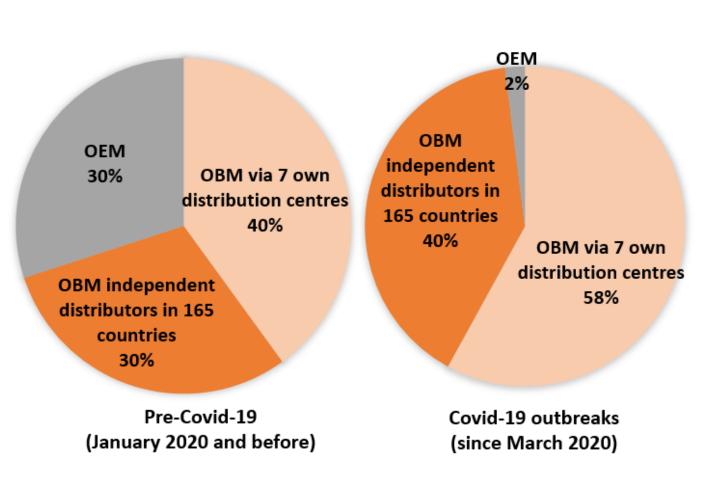

- We have seen repeat orders from government agencies in many countries
- Strong demand continues to yield higher average selling prices
- Income contribution:
  - a) Manufacturing 65%
  - b) Distribution 35%
- Buyers are paying 30%, 40% and 50% deposits in advance just to secure glove supply

## **Product Mix by Revenue for 1Q 2021 (July-Sept 2020)**

- All newer production lines are with 100% capacity producing Nitrile PF medical gloves
- Converted Latex PF capacity to produce Nitrile PF medical gloves started March 2020
- ASPs from Nitrile PF gloves are higher than Latex PF gloves
- All new factories under construction are earmarked to produce Nitrile PF gloves
- All production lines are flexible to be interchangeable between Nitrile PF & Latex PF

## Where did the glove supply go to?

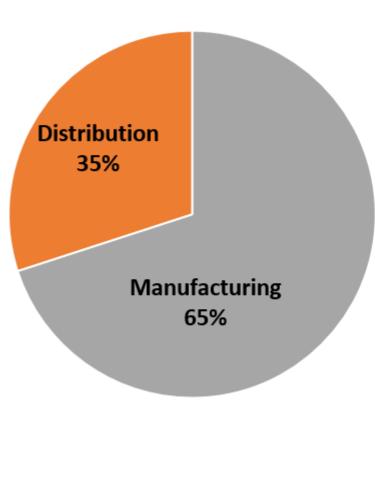

## Pre-Covid-19 (January 2020 and before)

- 40% goes to own distribution centres under OBM
- 30% goes to independent distributors in over 165 countries under OBM
- 30% goes to OEM customers

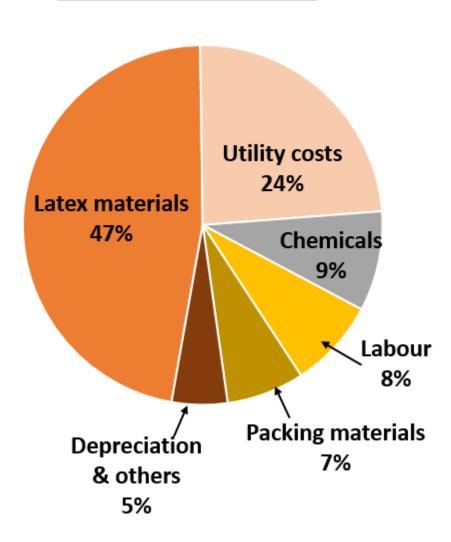

#### **Covid-19 outbreaks (since March 2020)**

- 58% goes to own distribution centres under our own brand of gloves
- 40% goes to independent distributors in over 165 countries under OBM
- 2% goes to OEM customers, especially to the big US distributors

## **Earnings Contribution**

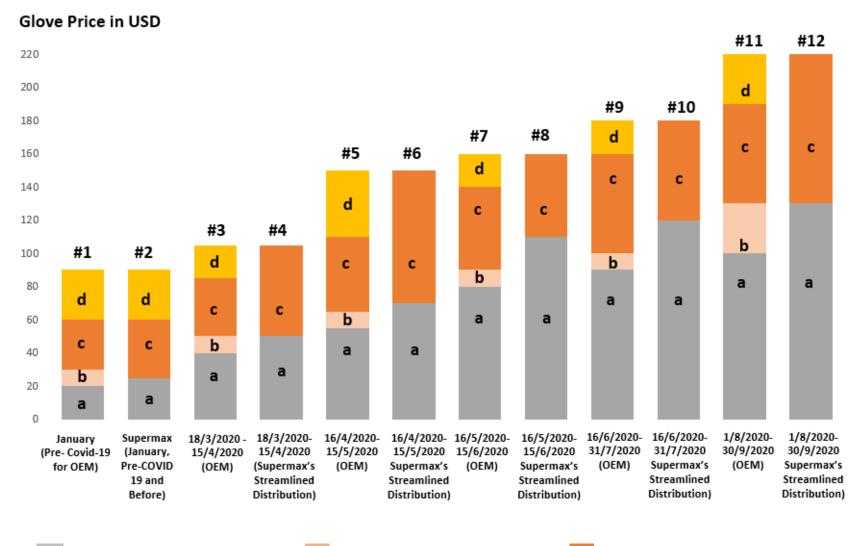

# **Manufacturing Costs**

- 65% of earnings contribution is derived from manufacturing while 35% is from distribution
- Largest manufacturing cost component is latex materials at 47%
- Utility makes up 24% of manufacturing costs comprising natural gas, electricity and water
- This is followed by chemicals at 9%, labour at 8% and packing materials at 7%
- Depreciation & others constitute5% of manufacturing costs

## SUPERMAX'S STREAMLINED SUPPLY CHAIN

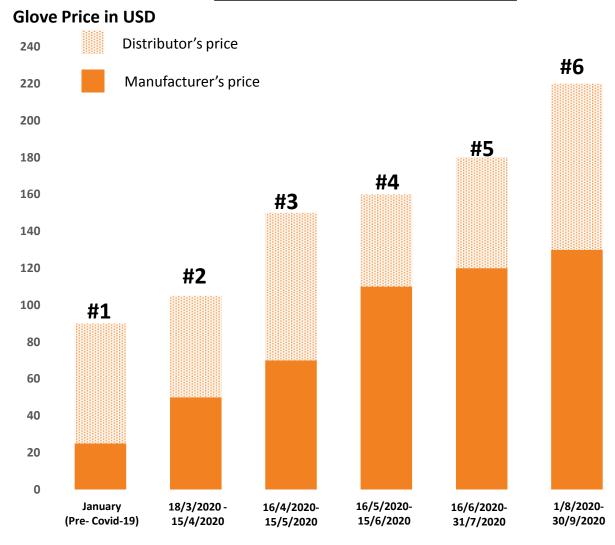

- Eliminate all middlemen such as agents, brokers, traders, dealers.
- Selling direct to end users, hospitals, governments of various countries via independent distributors, and via own distribution centres.
- Continue to work with our independent distributors for supply to end users.
- ➢ Bar #1 and #2 show that we have eliminated the agents, and distribution has benefited.
- Bar #3 and #4 show that we have eliminated the agents AND the dealers, and both manufacturing and distribution has benefited.
- ➤ Bar #5-#12 is similar to chart #4, that we have eliminated agents/dealers and both distribution and manufacturing has benefited ENTIRELY; throughout the period (columns 1-12).

- Manufacturer's selling price (Supermax factory)
- GPO/Traders/Brokers/Agents & Middlemen fees
- Importer/Wholesaler/Distributor (Supermax distribution centre)
- Dealer

### **CHANGE OF FORTUNE**

#### **NITRILE GLOVE ASP TREND IN USD**

#### January 2020 (pre-Covid-19)

- Chart #1 Buyer's market
- Manufacturers are working with between 9% and 13% manufacturing margins
- Constant pricing pressure from big distributors, especially the OEM manufacturers

#### Since March 2020 (Covid-19 outbreak)

- Chart #2 to #6 Market turns to seller's market
- Exponential growth in demand
- For most of distribution warehouses in Europe, North America, etc., working inventories are swiftly sold within 4 to 6 weeks
- Sellers dictate prices and capacity to offer to buyers
- Buyers are willing to pay high prices as long as manufacturers are able to offer capacity allocation
- Margin expansion for both manufacturers and distributors

# <u>Distribution Centres operating under Tax-</u> <u>Friendly Environment</u>

<b>Hong Kong:</b>	16.5%
Singapore:	17.0%
<u>UK</u> :	19.0%
<u>Ireland</u> :	12.5%
Canada:	26.5%
<u>USA</u> :	21.0%
Brazil:	34.0%
<u>Japan</u> :	30.62%

Note: For UK, all PPE products including medical gloves are exempt from both Purchase/Import VAT and all Sales VAT, both of which are at 20%; effective from 1/5/2020 to 31/7/2020 and has since extended to 31/10/2020.

#### **PLANT #12**

#### **Block A - fully operational**

> Capacity - 2.2 billion per annum

#### **Block B**

- > Installation of production lines resumed since 4.5.2020
- Target to start commissioning for 1<sup>st</sup> 4 double former lines by 3Q CY2020
- Remaining 4 double formers lines by 4Q CY2020
- Capacity 2.2 billion per annum

#### **PLANT #13 & #14**

- Construction started in January 2020
- Resumed construction on 4.5.2020
- Capacity
  - Plant #13 3.75 billion gloves per annum
  - Plant #14 3.75 billion gloves per annum
- Time line: 15-18 months for both plants

#### **PLANT #15**

- Tenant moved out in July 2020
- Capacity
  - 3.75 billion gloves per annum
- > Time line: 15-18 months

#### **PLANT #16**

- > Capacity
  - Block A 2.75 billion gloves per annum
  - Block B 2.75 billion gloves per annum
- > Timeline: 18-24 months

#### **PLANT #17**

- Capacity
  - Block A 2.75 billion gloves per annum
  - Block B 2.75 billion gloves per annum
- Timeline: 18-24 months

## **CAPITAL EXPENDITURE**

NEW CAPACITY EXPANSION	Capex (RM million)	Target Completion Date (Calendar Year)
<ul> <li>Plant #12 (Lot 6061)</li> <li>Block B (production machineries only)</li> </ul>	65.0	100% (2020)
- Plant #13 (Lots 6072 & 6073)	230.0	75% (2021) 25% (2022)
- Plant #14 (Lots 6072 & 6073)	230.0	25% (2021) 75% (2022)
- Plant #15 (Lots 6072 & 6073)	250.0	100% (2021)
- Plant #16 & Plant #17 (Lot 6062 & Lot 6060)	520.0	25% (2021) 75% (2022)
TOTAL	<u>1,295.0</u>	

Note: Land costs amounting to total of RM107 million has been paid for Plants #13, #14, #15, #16 & #17

# **SUMMARY OF EXPANSION PLAN (2020-2022)**

	Annual capacity as at 31.12.2018 (Million pcs/ line)	New expansion (Million pcs/ line)	Annual capacity as at 31.12.2020 (Million pcs/ line)	New expansion (Million pcs/ line)	Annual capacity as at 31.12.2021 (Million pcs/ line)	New expansion (Million pcs/ line)	Annual capacity as at 31.12.2022 (Million pcs/ line)
SUPERMAX GROUP	21,751 (174)*		26,175 (206)		36,425 (286)		48,425 (376)
Added capacity from:							
- New lines from Plant #12 (Lot 6061)		+4,424 (32)					
- New lines from Plant #13 (Lots 6072 & 6073)				+2,750 (22)		+1,000 (8)	
- New lines from Plant #14 (Lots 6072 & 6073)				+1,000 (8)		+2,750 (22)	
- New lines from Plant #15 (Lots 6072 & 6073)				+3,750 (30)			
- New lines from Plant #16 (Lot 6062)				+1,375 (10)		+4,125 (30)	
- New lines from Plant #17 (Lot 6060)				+1,375 (10)		+4,125 (30)	
TOTAL	21,751 (174)	+4,424 (32)	26,175 (206)	+10,250 (80)	36,425 (286)	+12,000 (90)	48,425 (376)

<sup>\*</sup> Excludes installed capacity of 1.973 billion pcs from 25 lines from Lahat Plant which was decommissioned in 2018

## INVESTMENT IN MANUFACTURING OF PPEs IN USA, UK & CANADA

- Building manufacturing of PPEs closer to customers
- Vulnerability of disruption of PPE supply chain from over dependence on imports is a primary concern to governments around the world
- Reinvestment of earnings from distribution centres where Supermax operates
- Allocation of US\$300 million in Glove manufacturing in USA for Phase #1 and US\$250 million for Phase
   #2
- Allocation of £50 million in Glove manufacturing for supply to government and certain European countries
- Plant #18 in USA and Plant #19 in UK
- Facemask manufacturing in Canada, started commissioning since September 2020
- Millions of made in Canada face masks have been delivered to the government of Canada

- Appointing an investment banker ('IB') soon to carry-out this exercise
- Objectives are:
  - a) To raise funds for future business expansion
  - b) To widen shareholders base
  - c) To expose Supermax Globally in the financial markets
- Target to complete within 6 months from date of appointment of IB
- Full details would be announced once IB is officially appointed

Differentiation with successful Original Brand Manufacturer ("OBM") model

- Worldwide trusted homegrown glove brands such as Supermax, Aurelia, Maxter, Medic-dent & Supergloves
- Gain customer loyalty and 2<sup>nd</sup> stream of income (distribution income)

High returns since IPO, solid balance sheet

- Returns of over 350x since IPO in 2000 with an initial market capitalisation of MYR80mn. Current market capitalisation > MYR28.0bn
- Healthy balance sheet with a net cash position

Solid capacity growth, proving potential uplift to margins

- Newer plants are highly efficient & can achieve EBITDA margins of > 20%
- Target to achieve a total of 48.4 billion pieces by CY 2022

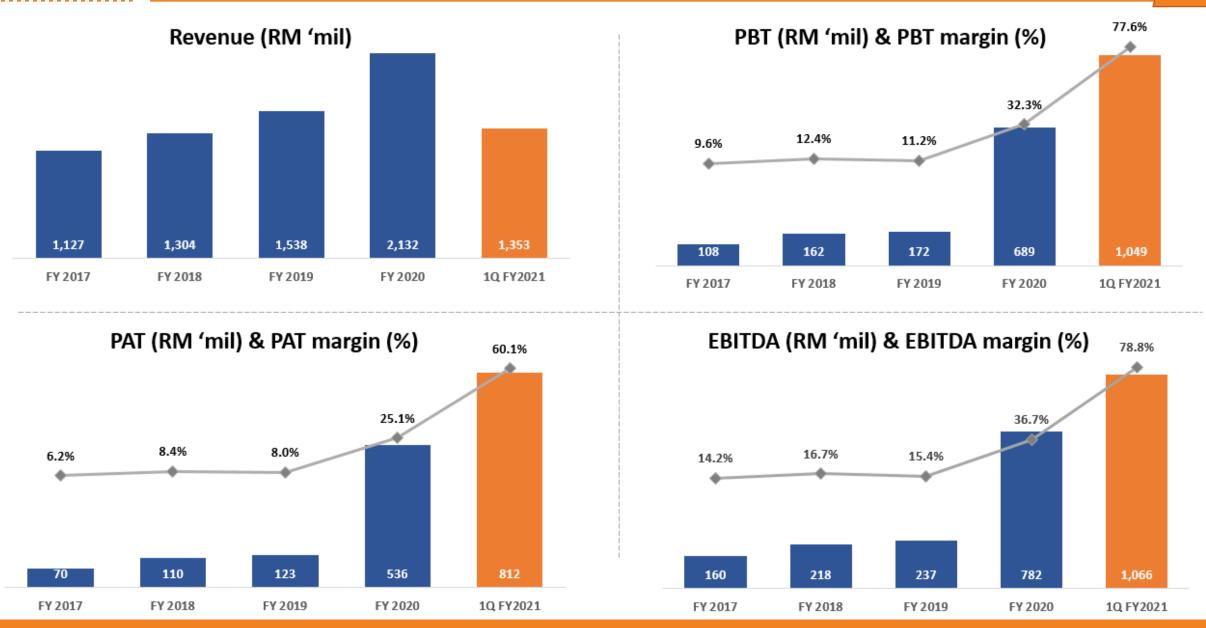

Healthy demand growth, recession-proof

- Demand for rubber gloves is inelastic, hence the glove industry is recessionproof
- Demand will continue to grow, fuelled by global trends in healthcare spending, hygiene awareness & structural changes from COVID 19

Broad global footprint with geographical expansion in the pipeline

- Export footprint spans across > 165 countries, collaborates with > 1,200 distributors in addition to eight own distribution centres (USA, Brazil, Canada, Ireland, UK, Hong Kong, Singapore & Japan)
- Contact lens business: obtained licenses from the United States' FDA to export lenses

#### **CHINA**

Donated 3 million of gloves directly to Wuhan

赠品

For Single Use

 Co-sponsored a total of 8.9 million of gloves to China in February 2020

#### **MALAYSIA**

 Donated and co-sponsored total of 6 million gloves to the local hospitals and frontliners from 23/3/2020 to 18/4/2020

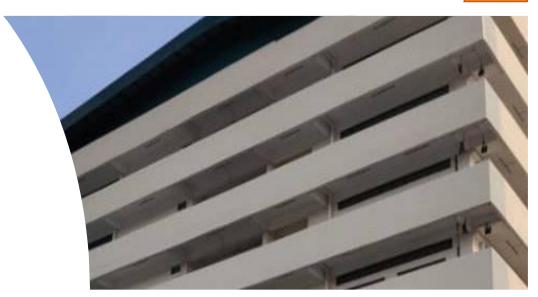

Supermax has commissioned and undergone a Sedex Members Ethical Trade Audit (SMETA) audit by an independent auditor successfully and admitted as a member of SEDEX.

SEDEX is one of the world's leading ethical trade service providers, working to improve working conditions in global supply chains. It provides practical tools, services and a community network to help companies improve their responsible and sustainable business practices, and source responsibly.

SMETA is an ethical audit format which reports on Sedex's four pillars of labour, health, safety and environment in reflecting good business ethics.

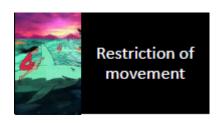

# U.S. Customs and Border Protection

- The US CBP had in June 2020 engaged the Malaysian Rubber Glove Industry in dialogue and discussion, expressing their concerns on news reports highlighting instances of FORCED LABOUR in many developing countries such as Democratic Republic of Congo, Malawi, Uzbekistan and also Malaysia.
- The industry, through the Malaysian Rubber Glove Manufacturers Association (MARGMA), has assured that forced labour is a matter taken very seriously by the industry players, and that the necessary measures have been taken wherever possible and continue to be taken and improved upon over time. In fact, the Association had called on all members to join SEDEX and to adopt the SMETA best practices in terms of the 4 pillars of labour, health, safety and environment. This was unanimously agreed to be all the members.
- The Supermax Group is fully committed towards social compliance and strives to ensure that there are no forced labour practices at its factories and have implemented various initiatives towards this end. To validate the efforts put in and the progress made, the company had in 2018 commissioned and successfully undergone a SMETA audit conducted by independent international auditors as mentioned in the preceding slide. Existing policies and procedures are constantly being reviewed for gaps if any and for further improvements. As part of efforts to improve further, the Group is looking into engaging an internationally accredited consulting firm to provide guidance on further best practices.

Measures taken by Supermax to address forced labour indicators highlighted by the US CBP include:

Workers' passports and other identification documents are no longer held by the company and are kept by the workers themselves. Secure lockers have been installed for the workers to safekeep their important documents.

Debt-Free Recruitment Policy implemented whereby the company engages reputable recruitments agencies with the arrangement that all agent fees and other recruitment-related fees are absorbed by the Company on behalf of the workers.

Malaysian Labour Law cap of not more than 104 hours of overtime a month is strictly observed. Workers have a day off each week and those keen to work overtime are allowed up to 3 hours overtime a day (or 72 hours a month).
